

Elizaveta Abramova

Frontend Developer

Tbilisi, Georgia / Tel.: +995 591 11 47 29 / E-mail: a.d.elizaveta@gmail.com / [LinkedIn](#)

SUMMARY

Frontend Engineer specializing in React, TypeScript, and Next.js. Focused on optimizing web performance, establishing maintainable frontend architecture, and reducing production bug rates. Experienced in transforming complex UI/UX designs into accessible, scalable features while ensuring reliable data state management and smooth integration with backend services.

SKILLS

Languages & Core Tech: JavaScript (ES6+), TypeScript, HTML5, CSS3, Core Web Vitals

Frameworks & Architecture: React, Next.js, Feature-Sliced Design (FSD), Turborepo

State & Data Management: Zustand, Redux Toolkit, TanStack Query, React Hook Form, Zod, REST API Integration

Routing & Tooling: TanStack Router, Vite, Storybook, ESLint

Testing: React Testing Library, Vitest

UI Libraries: Shadcn/UI, Tailwind CSS, Material UI (MUI)

Workflow: Git, GitLab, Jira

PROFESSIONAL EXPERIENCE

Sovlium

Tbilisi, Georgia

Online educational community platform.

Frontend Developer (April 2026 – Present)

- **Developed a custom** text editor module by integrating and extending the TipTap library to support custom UI/UX requirements and enabling users to seamlessly create, store, and share educational materials .
- **Designed and implemented** a resilient file-uploading mechanism with built-in connection-loss handling, preventing data loss and improving user experience during network drops.
- **Scaled core features** for the online interactive board, resolving legacy bugs and ensuring stable real-time user interactions.
- **Reduced codebase technical debt** by keeping strict clean-code standards and constructive code review process within the team.

Tech stack: TypeScript, React, Next.js, Vite, TanStack Router/Query, Zustand, Tailwind CSS, Shadcn/UI, Turborepo, FSD, Storybook.

Andersen Lab

Tbilisi, Georgia

Global outsource software development company.

Frontend Developer (October 2024 – February 2026)

- **Optimized application performance** and rendering logic, achieving a 23% reduction in unnecessary re-renders through deep optimization of React hooks and migrating from Context API to optimized state selectors.
- **Covered critical UI** and asynchronous event logic with unit tests, decreasing production bugs by 40% and ensuring higher application predictability.
- **Accelerated frontend development velocity** and guaranteed strict visual consistency across multiple project modules by scaling and maintaining the internal shared component library (based on MUI).
- **Prevented engineering bottlenecks** and reduced rework time by collaborating directly with UI/UX designers and business analysts to evaluate technical feasibility during early feature refinement.
- **Ensured secure and predictable** user flows by co-developing and testing a multi-role authentication module in close collaboration with the backend team.

Tech stack: TypeScript, React, Redux Toolkit, Storybook, React Testing Library, GitLab, Jira, ESLint

EDUCATION

Udmurt State University

Izhevsk, Russia

Bachelor's degree in Tourism (2016 – 2020)

CERTIFICATIONS

The Rolling Scopes School

React Course (07/2024 - 09/2024)

ADDITIONAL INFORMATION

- **English:** Intermediate (B1+)
- **Russian:** Native
